Circus

Python

Corkscrew

Rollbacks

Gypo break

Vice versa

## Vixen break

### TYPES OF DISPLAY

There are three types of display the Team Leader can elect to fly – full, rolling or flat. To carry out a full, looping, display the base of the cloud must be above 5,500ft to avoid the aircraft entering the cloud at the top of the loop. If the cloud base is less than 5,500ft, but more than 2,500ft, the team will perform the rolling display – substituting wing-overs and rolls for the loops. And when the cloud base is below 2,500ft, the Team will fly the flat display, consisting of a series of flypasts and steep turns.
